RE: Response to Site 8A PCB Spill Area work request
Marine Corp Recruit Depot (MCRD)
Parris Island
SC6 170 022 762

Dear Mr. Owens and Mr. Harrington:

The Division of Waste Management of the South Carolina Department of Health and Environmental Control (Department) completed the review of the above letter received September 3, 2013. The Department reviewed the letter and associated attachments, in addition to previous investigations at Site 8A.

The Department understands that maintenance action must occur before additional investigation/remediation (potentially involving penetrating the proposed concrete slab) is completed for this site. In order for the MCRD to move forward with the maintenance activity, the Department wants to ensure that MCRD and the Navy understand that this activity should be discussed in CERCLA documents in the future. Any soil removed should be properly analyzed and disposed with appropriate documentation sent to the Department. Additionally, as stated in the MCRD letter, the Department reiterates appropriate worker safety precautions should be taken in this area.

The Department's review is based on the information presented by MCRD to date; any information found to be contradictory may require further action. If you have any questions regarding this issue, please contact me at (803) 898-0368.

Sincerely,

A handwritten signature in cursive script that reads "Meredith Amick".

Meredith Amick, P.E., Environmental Engineer
DOD Corrective Action Section
Division of Waste Management
